

NATUR ARTEM[®]

We Live the Wood.

Every product of ours is made with handcrafted quality from authentic natural wood.

Our journey began in 2019.

The long naps of our daughter allowed us to turn our passion for wood decoration into reality.

Joining forces with family members, we decided to purchase our first laser cutting machine. Like many successful businesses, we started in a garage. We experimented with various types of wood, performed different cuts, and played with colors and styles to perfect our craftsmanship and make our products unique.

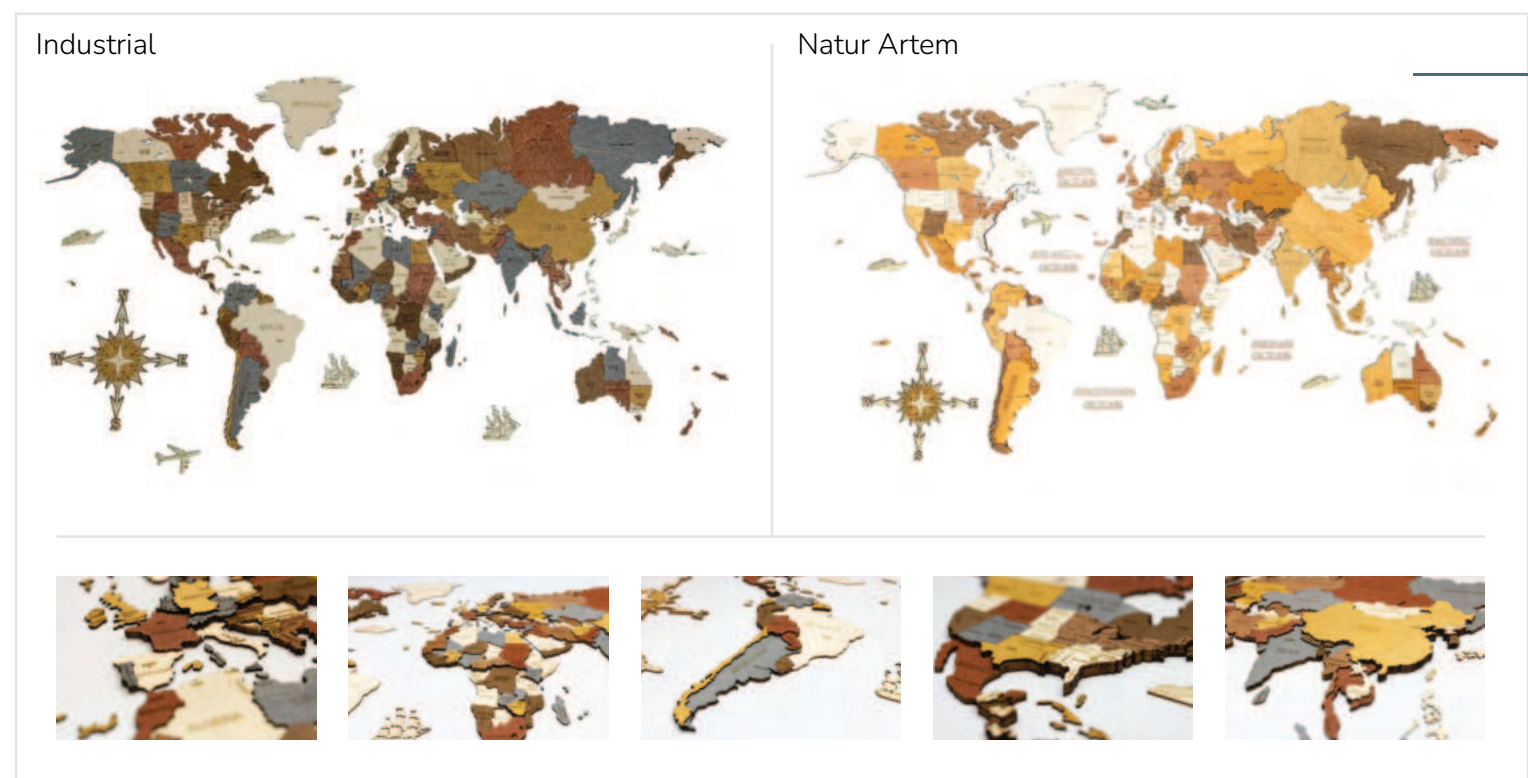

By 2024, our dream will become a reality.

We purchased a production warehouse, and our team was able to produce over 300 maps a month. Our work “family” is ready for this new adventure, and with everyone’s support, we are set to realize this international dream!

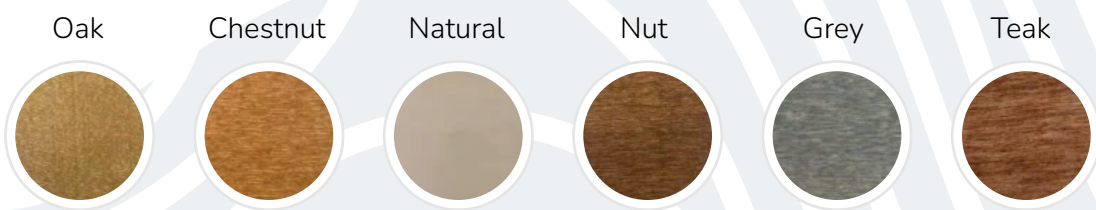

Products
